

MLDMHI ALUMNI ASSOCIATION (MLDMHIAA)

Third alumni meet: 12th March 2023

It was an event awaited by the institute and the prestigious alumni as it was happening after a gap of three long years due to the covid- 19 breakout. The alumni were slated to meet on the 12th of March 2023 in the auditorium at DMH, Palghar and cherish their achievements and remember our beloved NLT sir.

As stated the occasion was special. The alumni meet was kept primarily to experience the journey of our senior most alumnus, Dr. Dilip Nandha. This important sharing was followed by the reminiscence of our beloved NLT sir after an unanticipated event in February 2023 of his demise.

The second floor of the RHH was indeed decked up to receive the alumni. The students and faculty devoted the best part of the previous evening and night to decorate the place and showcase the achievements of the institute in a nutshell. Creativity was at its height in visualizing the hand packed memento comprising of a pen (with engraved MLDMHIAA) provided to each alumnus. Team Bhopoli had created and presented a short video showcasing the growth of the institute over the previous decade.

It was a joyous moment for the ICR- MLDMHI fraternity to listen and observe the journey of Dr Dilip in various arenas of his life. It was an outcome of the labour of teaching and love by our beloved senior faculty in giving a direction to the budding homoeopath to lead the torch of Homoeopathy in Standardize practice. Also, the important and wonderful sharing of his stories about older days at the Alma mater and taking up positives from those to advance towards brighter future. This has definitely given a source of inspiration to most of the alumni and the younger students who attended the function.

After an impressive sharing of personal and professional journey of Dr. Dilip Nadha sir, all came together to remember NLT sir from their deep rooted emotional memories of sir. Many have shared their emotional memories with NLT sir, especially Dr. Tanvir who burst out while talking about him and her experience of overcoming specific sensitivity. Many others like Dr. Bhagirath, Dr. Radhakrishna, and Dr. Rajesh Nalawade etc. went back on their memory lane and expressed about them to the group. The important teaching of sir of life and livings had stuck every one and was shared by all. His care for the patient along with the physician with his styles of CSEF discussion certainly left a huge mark on each of our lives as shared by the Alumni.

This was followed by a very important sharing of the Kolhapur Alumni chapter standing upfront all the time. They as a team and individuals shared their personal and team journey to achieve excellence and became the India's second NABH accredited AYUSH multispecialty clinic.

This eye opening and inspirational sharing was followed by celebration of achievements of Alumni in various fields of their professional career. They were felicitated for acquiring a variety of achievements in the fields of homoeopathy at government levels to achieving success, even by clearing the international medical exams. Ten alumni were felicitated with NLT sir's book and warli artwork (not bouquet), so that their journey towards unprejudice and excellence continues. It is notable that in spite of many hurdles and time constraints, the attendance at the function was impressive and total of 55 Alumni could attend and share their view with the newer generation of students. After which all were welcomed by recent batch students along with their faculties in their respective departments. A lot of meaningful discussion occurred relating to deepening the associations of the members and establishing a two-way traffic whereby the members would benefit from the experienced faculty and would also contribute to the development of their respective departments. Also guide the freshly passed out students to settle in their practice.

There are many decisions taken to involve the alumni for some or the other activities towards the common goal of community outreach. Some of the projects of the e-journal and podcasts were discussed by the team social media and the alumni. It was not all emotions and enjoyment and delicious food that marked this day. An important seminal decision was taken to conduct the future Alumni meet programs in month of Jan with well in advance notice to all. Some of the alumni also attended and participated in the annual function program (Euphoria 2023) alongside recent students.

This is an additional step towards the long and endless journey. We look forward to many such occasions where the alumni meet, share and deepen their relationship so that the practice of standardized Homoeopathy grows and continues to spread all around.

Departmental meetings:

Department of psychiatry discussed out with alumni their experiences along with sharing of the changes and progress happened in department over the period of time. Interesting sharing of personal activities by alumni in the field of counseling, sexology etc. came out. All together decided to plan and conduct a national level seminar on upcoming World Mental Health day by involving all the alumni and recent students. Also alumni were encouraged to come up for podcast to share their experiences with the world and help the successive generations. Even certain decisions involving alumni for certain training activities for the departmental students was discussed and decided.

Pediatric department discussed and planned for online/offline sessions by alumni frequently. Discussion with various alumni on the various schools of thoughts on what's app group.

Repertory department discussed with their alumni and finalized to keep current students in touch with their alumni as also to get guidance about the further career options. Also many more online or offline sessions like the one taken by Dr. Navnit and Aalim in past to be conducted often, possibly if once a month.

Medicine department encouraged alumni to be more active in groups for updating the group with various knowledges and experiences, also to share their personal achievements with group. HOD encouraged alumni to participate actively in institutional activities like symposium etc.

Dr. Rajesh Yadav

General Secretary, MLDMHIAA and Reader, Department of Psychiatry
